SUMMARY

Backend-focused software engineer with 6 years of experience building payment and search systems in Python and Go. I enjoy turning slow, fragile services into fast, boring ones.

EXPERIENCE

Senior Software Engineer, Klarno

2022 – present

- Led the rewrite of the refund service in Go; p95 latency dropped from 900 ms to 120 ms.
- Introduced contract tests between 14 services, cutting integration incidents by half.
- Mentored four junior engineers, two of whom were promoted within a year.

Software Engineer, Spotify

2019 – 2022

- Built the podcast search indexing pipeline (Python, Kafka, Elasticsearch).
- Reduced indexing cost by 35% by batching writes and removing duplicate documents.

Junior Developer, Nordic Retail AB

2018 – 2019

- Maintained a Django web shop with 200k monthly visitors.
