

Lukas Weber

Head Baker, learning software development · Hamburg · lukas.weber@example.com

Profile

Head baker with nine years in artisan bakeries. For the last two years I have been teaching myself programming in the evenings, and I now want to move into software development as a junior developer.

Experience

Head Baker, Bäckerei Sonnenkorn (2019 – present)

- Run the night production for three shops: 1,200 rolls and 150 loaves before 6 am.
- Lead a team of five bakers and two apprentices; wrote the shift plan and the recipe cards.
- Cut flour waste by 18% by tracking daily sales against production in a spreadsheet.

Baker, Hansen Brot (2016 – 2019)

- Sourdough and pastry production; trained new colleagues on the dough machines.

Software projects

- **Bakery stock tracker** (2025): a small web app in Python and Flask that replaced the flour spreadsheet. Used every morning by the team.
- Personal website with HTML and CSS; first steps with JavaScript.

Education

Online course "Python for Everybody" (University of Michigan, 2024)

Master Baker certificate (Meisterbrief), Handwerkskammer Hamburg, 2019

Apprenticeship as a baker, 2013 – 2016

Skills

Python (beginner), Flask, HTML, CSS, Git basics, spreadsheets, team leadership, planning under time pressure
